### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art of record fails to teach or suggest the recited biaxially oriented polyester film. Independent claim 1 identifies the uniquely distinct features of "a surface roughness (Ra) in the range of 10 nm to 140 nm" and "an elongation at break in a machine direction of 80% to 150%". The closest prior art of record, Tsunekawa et al. (USPN 6,420,011), discloses a biaxially oriented polyester film comprising a polyester as a main component and a polyimide, which either singularly or in combination, fail to anticipate or render obvious the above limitations. Furthermore, the obviousness-type double-patenting rejection using the closest prior art of record, Tsunekawa et al. (USPN 6,420,011) was overcome by the filing of a terminal disclaimer and the rejection under 35 USC 103 (a) rejection using the Tsunekawa et al. patent was overcome by showing that the subject matter of the reference and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
